

STEM Programs

Science, technology, engineering and mathematics are important and growing fields, and our students need the skills to excel in these areas.

At Our Lady of the Lake School we offer every child access to a state-of-the-art computer lab. We use iPads, Chromebooks and smart boards in classrooms. We provide creative hands-on learning in the sciences through field experiments, science fairs and field trips. And we ensure students ready for more have access to gifted programs and advanced learning through education partnerships.

We understand the importance of nurturing an interest in STEM fields, and helping all our youth pursue interests in these exciting areas. For more information about our STEM programs, or to schedule a visit to our school, please call us.
