

May 25, 2025

Dear _____ ,

It is with great alarm and concern that I reach out to you as a constituent and a person of faith over the changes made to our environmental practices, agencies and policies that will have a detrimental effect on the health and welfare of our nation and our world, and have threatened many of our rights and protections as citizens. Please address the following issues of vital concern:

1. Eliminate the efforts to rebuild coal, natural gas and oil industries, the second largest emitters of greenhouse gasses. Rejoin over 50 nations that have committed to reducing the use of fossil fuels, which increases consumer costs and pollution, and to promoting changes that will contribute to climate improvement.
2. Restore clean energy funding and permits for research and development that have been targeted with cuts to clean energy technologies and climate grants. Statistically the Clean Energy Sector has been a growth industry, adding 3 times more workers than fossil fuel jobs.
3. Reinstate the Sixth National Climate Assessment report that outlines the risks, impacts and responses to climate change. This comprehensive, scientific study is mandated by Congress to provide vital information for lawmakers and should not be eliminated by an administrative action.
4. Reinstate EPA regulations established to reduce pollution in air, water, and the land thereby protecting health and safety for all people. Deregulation places profits of businesses over the welfare of our citizens and the global environment.
5. Guarantee our rights to be informed and protected with due process in matters of public interest and decision making. According to the Supreme Court, the Administrative Procedure Act requires "Notice and Comment" when agencies issue new rules or appeal old ones. Essential agencies that research, predict and promote our health and safety are being erased. Congress and the courts must maintain our Constitutional rights and freedoms to inform the public and act with accurate information.

We depend on you to retain your responsibilities to enact just legislation, working with cooperation and urgency to provide for the healthy future of our people and our earth.

Sincerely,
